Product Description

Boxer 375 Mini Skid Steer

As part of the 300 Series, the gas-powered 375 offers the power that Boxer has become known for in a smaller package, allowing you to reduce overhead and increase job site productivity. Designed to handle a full complement of attachments, the 375 helps minimize hand labor. Because of its reduced size and ease of operation, the 375 is ideal for the rental industry. This compact machine provides the strength to perform a variety of tasks and the versatility to get into a tight area. At 35" (889 mm) wide, the unit can fit through a standard gate. The two-pump, 2,800 psi (193 bar) hydraulic operating system develops optimum hydraulic flow to run the machine's auxiliary and propulsion systems, providing enough power to handle full-size attachments. A dedicated oil cooler to better manage hydraulic heat generation. With a universal compact utility loader mounting plate and quick-attach system, you can quickly and easily switch between any standard attachments.
