Product Description

ET42 Compact Excavator - Enclosed Canopy

The ET42 tracked excavator offers large machine features in a smaller package. This 4.0-ton class machine is designed to assure that the performance and features offered meet the demands of the operator. Key innovations include enhanced visibility, operator comfort features and a linkage system that offers greater digging depth and dumping height, all contributing to a productive, high-performing excavator.

Features:

- Three-point kinematic bucket linkage system enables a 200-degree bucket rotation for excellent breakout force, greater digging depth and dumping height
- Low profile hood and large windows provide an exceptional view the front of both tracks and the offset boom provides a complete view of the boom, attachment and work area
- Load Sensing Flow Sharing system allows consistent and precise control regardless of load and offers comfortable and fatigue-free joystick control
- Fuel efficient 46-hp Perkins diesel engine offers class-leading power and performance
